AN OVERVIEW

In many countries, aquaculture is booming, yet gaining practical, straight forward knowledge about fish and shrimp nutrition for producing performance and profitable aquaculture feeds is hard to find. If you are seeking this kind of information either because you are focusing specifically on making feeds for fish and shrimp or coming from another feed type industry and you would like to learn, this is the place to be. The Aqua Nutrition AgriSchool is a comprehensive course that covers all the fundamentals of fish and shrimp nutrition, the range of feed ingredients to be considered and why, along with useful insights for application to various Asian species provided by seasoned nutritionists and feed industry veterans.

LESSON 1

AQUA FEEDS: AN OVERVIEW

LESSON 2

FISH NUTRITION REQUIREMENTS
